SCALE FOR PROJECT PISCINE JAVA (/PROJECTS/PISCINE-JAVA) / DAY 04 (/PROJECTS/PISCINE-JAVA-DAY-04)

You should evaluate 1 student in this team

Git repository

`git@vogsphere.kzn.21-school.ru:vogsphere/intra-uuid-e6ba8f9`

Introduction

The methodology of School 21 makes sense only if
peer-to-peer assessments are done seriously.
This document will help you to do it properly.

- Please, stay courteous, polite, respectful and constructive in all communications during this assessment. The bond of trust between community 21 and you depends on it.
- Highlight possible malfunctions of the work done by the person and take the time to discuss and debate it.
- Keep in mind that sometimes there can be differences in interpretation of the tasks and the scope of features. Please, stay open-minded to the vision of the other.

Guidelines

- Evaluate only the files that are on the GIT repository of the student or group.
- Doublecheck that the GIT repository is the one corresponding to the student or the group as long as to the project.
- Meticulously check that nothing malicious has been used to mislead you and have you assess something except

the content of the official repository.

- If you have not finished the project yet, it is compulsory to read the entire instruction before starting the review.

- Use the special flags in the scale to report an empty or non-functional solution as long as a case of cheating.

In these cases, the assessment is completed and the final grade is 0 (or in a case of cheating is -42).

However, except for a case of cheating, you are encouraged to continue reviewing the project to identify the problems that caused the situation in order to avoid them for the next assessment.

- You must stop giving points from the first wrong exercise even if the following exercises are correct.

Preliminaries

Respect the rules

- The repository contains the work of the student (or group).
- The student is able to explain their work at any time during the assessment.
- The general rules and any rules specific to the day are respected throughout the assessment.

 Yes

 No

Piscine Java | MODULE 04

Exercise 00 – Packages

- Is there a README.txt file containing a description of commands?
- Does executing instructions in README.txt file result in creating valid content in target folder?
- Does the program output your image correctly?
- Does project structure comply with the task?

 Yes No

Exercise 01 – First JAR

- Is there a README.txt file containing a description of commands?
- Does executing instructions in README.txt file result in creating valid content in target folder?
- Does executing instructions in README.txt file result in a valid application startup?
- Does project structure comply with the task?

 Yes No

Exercise 02 – JCommander & JCDP

- Is there a README.txt file containing a description of commands?
- Does executing instructions in README.txt file result in creating valid content in target folder?
- Does executing instructions in README.txt file result in a valid application startup?
- Are JCommander mechanisms used to process command-line parameters?
- Does project structure comply with the task?

 Yes No

Ratings

Don't forget to check the flag corresponding to the defense

 Ok Outstanding project Empty work No author file Invalid compilation Norme Cheat Crash Leaks Forbidden function
