SCALE FOR PROJECT PISCINE JAVA (/PROJECTS/PISCINE-JAVA) / RUSH 00 (/PROJECTS/PISCINE-JAVA-RUSH-00)

You should evaluate 2 students in this team

★

Git repository

```
git@vogsphere.kzn.21-school.ru:vogsphere/intra-uuid-130f084
```    📋

Introduction

The methodology of School 21 makes sense only if
peer-to-peer assessments are done seriously.
This document will help you to do it properly.

- Please, stay courteous, polite, respectful and constructive in all
communications during this assessment. The bond of trust
between community 21 and you depends on it.

- Highlight possible malfunctions of the work done by the person
and take the time to discuss and debate it.

- Keep in mind that sometimes there can be differences
in interpretation of the tasks and the scope of features.
Please, stay open-minded to the vision of the other.

Guidelines

- Evaluate only the files that are on the GIT
repository of the student or group.

- Doublecheck that the GIT repository is the one
corresponding to the student
or the group as long as to the project.

- Meticulously check that nothing malicious has been used
to mislead you and have you assess something except

the content of the official repository.

- If you have not finished the project yet, it is compulsory
to read the entire instruction before starting the review.

- Use the special flags in the scale to report an empty
or non-functional solution as long as a case of cheating.
In these cases, the assessment is completed
and the final grade is 0 (or in a case of cheating is -42).
However, except for a case of cheating, you are encouraged to continue
reviewing the project to identify the problems that caused the situation
in order to avoid them for the next assessment.

- You must stop giving points from the first wrong exercise
even if the following exercises are correct.

Preliminaries

Respect the rules

- The repository contains the work of the student (or group).
- The student is able to explain their work
at any time during the assessment.
- The general rules and any rules specific to the day are
respected throughout the assessment.

☑ Yes   ✕ No

Piscine Java | RUSH 00

Exercise 00 – Give up, You're Surrounded

- Is solution comprised of two Maven projects?
- Does "resources" folder of Game project contain both "properties" files?
- Are all dependencies in Game project specified as dependency?
- Does mvn clean package command in the root of
Game project result in assembly of application archives in target folder?
- Does one of the archives contain all required dependencies?
- Is one of archives startable from the console?
- Is IllegalParametersException generated in case of wrong input data?

- Is IllegalParametersException a derived class of RuntimeException?
- Does the program support startup in production and dev modes?
(All differences between operating modes specified in the task
description must be considered).
- Run the program at least 10 times. Can player reach the target point
in all cases?
- Run the program at least 10 times. Are all input parameters considered
in generating the program?
- Does the program support colored output?
- Do modifications in properties files change the operational
logic of the program when reassembling the application?
- Add a properties file with a mode other than production and dev.
Does the program handle the new mode correctly when reassembling
the application and specifying the required profile?
- Have you succeeded in passing a single game scenario?
(player wins, player loses).

☑ Yes   ✕ No

Ratings

Don't forget to check the flag corresponding to the defense

✔ Ok   ★ Outstanding project

🗎 Empty work   💬 No author file   💀 Invalid compilation   🗊 Norme   🖱 Cheat   ⚱ Crash

💧 Leaks   ⊘ Forbidden function
